

Region 10's Potential High Tide Line Project-specific Special Case

Ex. 5 - Deliberative Process

[REDACTED]

[REDACTED] In response to NWD's inquiry as to the state's position, Washington Governor Jay Inslee submitted a letter endorsing a change to the highest astronomical tide (HAT) or similar elevation. (MAHT is, on average, less than four inches lower than HAT, but occurs more than thirty times as frequently; it is also very close to the elevation that the State uses in its Shoreline Management Program.)
